- Les commandes `influx` à l'intérieur du container retournent :

```
 Error: failed to find bucket "telegraf": Get
"http://monitor-influxdb:8086/api/v2/buckets?name=telegraf&org=cbna":
dial tcp 172.29.0.3:8086: connect: connection refused
```

- Solution : forcé la suppression du dossier contenant les data d'influxdb2. ATTENTION : perte de données ! Commande : `rm -fr /var/lib/influxdb2/engine/data/`. Cela ne nous pose pas de problème car nous ne souhaitons pas les garder !
