

# Configurer Nginx pour GeoNature Atlas

- Créer un fichier de config Nginx pour l'Atlas : `vi /etc/nginx/sites-available/atlas.conf`
- Y placer le contenu suivant :

```
server {
    listen 80;
    listen [::]:80;

    server_name nature.silene.eu;

    location / {
        proxy_set_header X-Forwarded-Host $host:$server_port;
        proxy_set_header X-Forwarded-Server $host;
        proxy_set_header X-Forwarded-For $proxy_add_x_forwarded_for;
        proxy_set_header X-Forwarded-Proto $scheme;

        proxy_pass http://127.0.0.1:8080/;# ATTENTION : bien mettre un
slash final ! Sinon => erreur 404
    }
}
```

- Créer un lien depuis les sites actifs : `cd /etc/nginx/sites-enabled/ ; ln -s ../sites-available/atlas.conf atlas.conf`
- Tester la config et relancer Nginx si OK : `nginx -t && nginx -s reload`
- Tester l'URL <http://nature.silene.eu/> qui doit afficher une erreur 502 si le serveur Gunicorn de l'Atlas n'est pas lancé.
  - Vérifier les services supervisés par Supervisor : `supervisorctl status`
  - Démarrer le service Atlas : `supervisorctl start atlas`
  - Arrêter le service Atlas : `supervisorctl stop atlas`
- Installer un certificat SSL via Certbot (Letsencrypt) : `certbot --nginx -d nature.silene.eu -d atlas.silene.eu`
  - Répondre : 2
  - Tester ensuite la redirection auto de HTTP vers HTTPS : <http://nature.silene.eu/> → doit redirigé vers HTTPS automatiquement
- Tester la configuration SSL : <https://www.ssllabs.com/ssltest/analyze.html?d=nature.silene.eu>
- Tester l'URL <https://nature.silene.eu/>
- La config finale :

```
server {
    listen 443 ssl; # managed by Certbot
    listen [::]:443 ssl; # managed by Certbot
    server_name nature.silene.eu;

    location / {
        proxy_set_header X-Forwarded-Host $host:$server_port;
        proxy_set_header X-Forwarded-Server $host;
        proxy_set_header X-Forwarded-For $proxy_add_x_forwarded_for;
        proxy_set_header X-Forwarded-Proto $scheme;
```

```
    proxy_pass http://127.0.0.1:8080/;# ATTENTION : bien mettre un
slash final ! Sinon => erreur 404
}

    ssl_certificate
/etc/letsencrypt/live/nature.silene.eu/fullchain.pem; # managed by
Certbot
    ssl_certificate_key
/etc/letsencrypt/live/nature.silene.eu/privkey.pem; # managed by
Certbot
    include /etc/letsencrypt/options-ssl-nginx.conf; # managed by
Certbot
    ssl_dhparam /etc/letsencrypt/ssl-dhparams.pem; # managed by Certbot
}

server {
    listen 443 ssl;
    listen [::]:443 ssl;
    server_name atlas.silene.eu;
    return 302 https://nature.silene.eu$request_uri;
}
server {
    listen 80;
    listen [::]:80;
    server_name nature.silene.eu atlas.silene.eu;
    return 302 https://nature.silene.eu$request_uri;
}
```
